Livello bibliografico	Monografia
Note generali	A valuable aid in minimizing therapeutic risks
Sommario/riassunto	<p>A Karger 'Publishing Highlights 1890–2015' title
</p> <p>A wealth of information and its clear organization make this survey of cutaneous drug reactions an indispensable reference source for the dermatologist and any physician prescribing drugs. It is the only publication which offers a systematic approach to the whole therapeutic armamentarium, as well as to the signs and symptoms affecting skin, mucous membranes, nails and hair. The information, documented by 5600 references, is presented in tabular form to allow quick location of needed data. Convenient indexes permit the user to trace either the side effects of specific drugs and their frequency or the possible drug causes of cutaneous reactions. The drug index contains both generic and brand names. Now entirely in English, this expanded and updated</p>

edition is easy to use and serves as both a practical diagnostic aid and an important source of references to the world literature.
