

1. Record Nr.	UNINA9910148818803321
Autore	Beelen D.W
Titolo	Bone Marrow Transplantation // D.W. Beelen, U.W. Schaefer
Pubbl/distr/stampa	Basel : , : S. Karger, , 1996
ISBN	3-318-04388-5
Edizione	[2nd, revised edition.]
Descrizione fisica	1 online resource (X + 126 pages) : : 17 figures, 3 in color, 17 tables
Altri autori (Persone)	BeelenD. W (Dietrich W.) NeuserJurgen Grosse-WildeH OttingerH
Disciplina	617.4/4
Soggetti	Hematology Immunology Transplantation Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Advances in clinical bone marrow transplantation during the last two decades have promoted its worldwide acceptance as a treatment modality for a number of life-threatening diseases of the hematopoietic system. Focusing on basic principles, clinical issues and future developments, this handbook provides a concise yet comprehensive introduction to the rapidly developing field of allogeneic and autologous bone marrow or peripheral blood progenitor cell transplantation. The first English edition of this useful handbook was very popular. The second revised edition, too, will prove to be a valuable aid not only for clinicians working in this field, but also for scientists and physicians not immediately involved in the treatment of transplant patients.
