

1. Record Nr.	UNINA9910148851703321
Titolo	Trauma and Combat Critical Care in Clinical Practice // edited by Sam D. Hutchings
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
ISBN	9783319287584
Edizione	[1st ed. 2016.]
Descrizione fisica	1 online resource (XXI, 529 p. 122 illus., 89 illus. in color.)
Collana	In Clinical Practice, , 2199-6652
Disciplina	616.025
Soggetti	Emergency medicine Traumatology Critical care medicine Emergency Medicine Traumatic Surgery Intensive / Critical Care Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	This book presents an overview of the management of critically injured patients, with a particular focus on the intensive care phase of the patient pathway. Almost all of the chapter authors are military clinicians with recent deployed experience in war zones and this brings a unique perspective to the book. The book provides an overview of the initial stages of the military trauma patient pathway but the main focus is on the decisions faced by the intensive care specialist once a critically injured patient arrives within the ICU. The question and answer format of the chapters provides pragmatic and evidence based guidance based on the accumulated experience of the authors during the last two decades of combat operations. However, the lessons learnt are also translated into the civilian setting and will be relevant to anyone looking after critically injured patients. Trauma and Combat Critical Care in Clinical Practice is a useful tool for critical care specialists as well as doctors in training within the specialty. It will also be of

relevance to those practicing in the pre-hospital and emergency
department environments. .
