Sommario/riassunto	In Religious Experience and the New Woman, Joanna Dean traces the development of liberal spirituality in the early 20th century through the life and work of Lily Dougall (1858--1923), a New Woman novelist who became known as a religious essayist and Anglican modernist. Dean examines the connections between Dougall's marginal position as a woman intellectual and her experiential, combatively iconoclastic theology, and demonstrates that through her writing and mentoring, Dougall contributed to the shapin

Sommario/riassunto

This book explores finite element methods for incompressible flow problems: Stokes equations, stationary Navier-Stokes equations, and time-dependent Navier-Stokes equations. It focuses on numerical analysis, but also discusses the practical use of these methods and includes numerical illustrations. It also provides a comprehensive overview of analytical results for turbulence models. The proofs are presented step by step, allowing readers to more easily understand the analytical techniques.
