Sommario/riassunto	<p>Eleanor is the story of choices that ripple through time far beyond the moment they're made. And what happens when, just sometimes, bonds are so powerful they reach beyond this world and into another... 1962, Anchor Bend, Oregon. The sea calls to Eleanor. Like the turn of the waves it beckons her from the heart of the town she's always known, from her husband Hob and their young daughter, Agnes, to the unfathomable depths of the ocean. 1985 Agnes's daughter Eleanor is six years old. She shares her name with the grandmother she never knew and everything else with her identical twin, Esmerelda. But to Agnes, only Eleanor is a constant reminder of the past. 1993 After a dark event leaves her family in tatters, Eleanor, now fourteen, is left caring for her alcoholic mother, whose grief has torn her apart. But when Eleanor's reality begins to unravel, she starts to lose her grip on time itself, slipping from the present into strange other lands where she's in danger of losing herself altogether.</p>
