	Sommario/riassunto	A typical undergraduate electrical engineering curriculum incorporates a signals and systems course. The widely used approach for the

laboratory component of such courses involves the utilization of MATLAB to implement signals and systems concepts. This book presents a newly developed laboratory paradigm where MATLAB codes are made to run on smartphones, which most students already possess. This smartphone-based approach enables an anywhere-anytime platform for students to conduct signals and systems experiments. This book covers the laboratory experiments that are normally covered in signals and systems courses and discusses how to run MATLAB codes for these experiments on smartphones, thus enabling a truly mobile laboratory environment for students to learn the implementation aspects of signals and systems concepts. A zipped file of the codes discussed in the book can be acquired via the website http://sites.fastspring. com/bookcodes/product/SignalsSystemsBookcodes.

Sommario/riassunto	Als Fortsetzer des Kirchenvaters Hieronymus befasst sich Prosper Tiro als einer von wenigen zeitgenossischen Autoren mit der Geschichte des Westromischen Reichs in der ersten Halfte des 5. Jahrhunderts. In der Fortsetzung der Chronik des Hieronymus bis ins Jahr 455 gibt Prosper einen Bericht uber seine Zeit, in dem er einzelne Ereignisse vergleichsweise genau datiert und eigene Wertungen hinzufugt. So wurde er seinerseits zum Ausgangspunkt fur weitere chronistische Darstellungen, von denen eine - der sog. Laterculus Regum Vandalorum et Alanorum - sich ebenfalls im vorliegenden Band findet. Der Text beider Quellen liegt nun erstmals in deutscher Ubersetzung vor.
