Sommario/riassunto	Medieval Monasticism is a bibliography meant as a guide to medieval monasticism, giving direction to the most important works in the subject and is prepared by an expert in the field, Dr. Constable. The bibliography has three aims: it meant to aid students who are relatively new to the area of study, to guide more advanced readers in a subject where they have had little formal training, and to assist new libraries in forming a basic collection in the subject presented.
