

1. Record Nr.	UNINA9910149201203321
Autore	Prothero Donald R.
Titolo	The Princeton Field Guide to Prehistoric Mammals // Donald R. Prothero
Pubbl/distr/stampa	Princeton, NJ : , : Princeton University Press, , [2016] ©2017
ISBN	1-78684-191-6
Edizione	[[Enhanced Credo edition]]
Descrizione fisica	1 online resource (241 pages) : color illustrations
Collana	Princeton Field Guides ; ; 112
Classificazione	NAT007000NAT019000SCI1000000SCI060000SCI054000
Altri autori (Persone)	WilliamsMary Persis
Disciplina	569
Soggetti	Mammals, Fossil Extinct mammals Paleontology - Cenozoic Mammals - Evolution Mammals - Phylogeny Illustrated works. Pictorial works.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- CONTENTS -- DEDICATION -- PREFACE -- 1. The Age of Mammals -- 2. The Origin and Early Evolution of Mammals -- 3. Marsupials: Pouched Mammals -- 4. Placental Mammals (Eutheria) -- 5. Xenarthra -- 6. Afrotheria -- 7. Euarchontoglires -- 8. Euarchontoglires -- 9. Laurasiatheria -- 10. Laurasiatheria: Chiroptera -- 11. Laurasiatheria -- 12. Laurasiatheria -- 13. Laurasiatheria: Ungulata -- 14. Laurasiatheria: Artiodactyla -- 15. Laurasiatheria: Perissodactyla -- 16. Laurasiatheria: Meridiungulata -- 17. Uintatheres, Pantodonts, Taeniodonts, and Tillodonts -- 18. Mammalian Evolution and Extinction -- Illustration Credits -- Further Reading -- Index
Sommario/riassunto	After the mass extinction of the dinosaurs 65 million years ago, mammals became the dominant terrestrial life form on our planet. Roaming the earth were spectacular beasts such as saber-toothed cats, giant mastodonts, immense ground sloths, and gigantic giraffe-like rhinoceroses. Here is the ultimate illustrated field guide to the lost world of these weird and wonderful prehistoric creatures.A woolly

mammoth probably won't come thundering through your vegetable garden any time soon. But if one did, this would be the book to keep on your windowsill next to the binoculars. It covers all the main groups of fossil mammals, discussing taxonomy and evolutionary history, and providing concise accounts of the better-known genera and species as well as an up-to-date family tree for each group. No other book presents such a wealth of new information about these animals-what they looked like, how they behaved, and how they were interrelated. In addition, this unique guide is stunningly illustrated throughout with full-color reconstructions of these beasts-many never before depicted-along with photographs of amazing fossils from around the world. Provides an up-to-date guidebook to hundreds of extinct species, from saber-toothed cats to giant mammoths Features a wealth of color illustrations, including new reconstructions of many animals never before depicted Demonstrates evolution in action-such as how whales evolved from hoofed mammals and how giraffes evolved from creatures with short necks Explains how mass extinctions and climate change affected mammals, including why some mammals grew so huge
