ISBN	1-134-83526-4 1-315-54449-0 1-134-83519-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (221 pages) : illustrations, tables, charts, graphs
Collana	Routledge Explorations in Development Studies
Disciplina	338.191724
Soggetti	Food security - Developing countries Hunger - Developing countries - Prevention Economic assistance - Developing countries Economic development - International cooperation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	1. Development aid, governance and food security -- 2. Methodology, data and methods -- 3. Cross-country view -- 4. Peru, Ethiopia, India, and Vietnam -- 5. Aid, governance and food security from the recipients' perspective -- 6. Up close and personal in Uttar Pradesh, India -- 7. Does who gives aid where and how affect food security?
Sommario/riassunto	At the global level, international actors have repeatedly expressed their desire to end hunger and food insecurity. However, food insecurity has persisted. More analysis is hence needed on the link between continuously high levels of global food insecurity and the ever increasing flow of development aid. Global Food Security and Development Aid investigates the impact that development aid has had on food security in developing countries and includes international case studies on Peru, Ethiopia, India and Vietnam. It examines the effect of development aid in general and the impact of aid divided into different categories based on donor, mechanism and sector to which it is provided. In each examined relationship between aid and food security, particular attention is paid to the potentially intervening role played by the quality of national and/or local governance. The book makes policy

recommendations, most importantly that donors should take greater care in considering which types of aid are suitable to which specific countries, localities, and development goals, and account for expected developments in the complex relationship between aid, food security, and governance. This book will be of considerable interest to students, researchers and policy-makers in the areas of development aid and food security.
