1. Record Nr. UNINA9910149384203321

Titolo	Ionospheric space weather : longitude and hemispheric dependences and lower atmosphere forcing / / Timothy Fuller-Rowell [and three others], editors
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2017] ©2017
ISBN	1-118-92923-3 1-118-92921-7
Descrizione fisica	1 online resource (314 pages) : color illustrations, maps
Collana	Geophysical monograph ; ; 220
Disciplina	551.5145
Soggetti	Ionospheric forecasting Space environment Longitude Boundary layer (Meteorology)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"This work is a copublication between the American Geophysical Union and John Wiley and Sons, Inc."
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"'Ionospheric Space Weather' includes articles from six science themes that were discussed at the Chapman Conference in 2012. These include: Hemispherical dependence of magnetospheric energy injection and the thermosphere-ionosphere response, longitude and hemispheric dependence of storm-enhanced densities (SED), response of the thermosphere and ionosphere to variability in solar radiation, longitude spatial structure in total electron content and electrodynamics, temporal response to lower-atmosphere disturbances, and ionospheric irregularities and scintillation. 'Ionospheric Space Weather: Longitude Dependence and Lower Atmosphere Forcing' will be useful to both active researchers and advanced graduate students in the field of physics, geophysics, and engineering, especially those who are keen to acquire a global understanding of ionospheric phenomena, including observational information from all longitude sectors across the globe"--Provided by
