Sommario/riassunto	ReAction! gives a scientist's and artist's response to the dark and bright sides of chemistry found in 140 films, most of them contemporary Hollywood feature films but also a few documentaries, shorts, silents, and international films. Even though there are some examples of screen chemistry between the actors and of behind-the-scenes special effects, this book is really about the chemistry when it is part of the narrative. It is about the dualities of Dr. Jekyll vs. inventor chemists, the invisible man vs. forensic chemists, chemical weapons vs. classroom chemistry, chemical companies that knowingly pollute the environment vs. altruistic research chemists trying to make the world a better place to live, and, finally, about people who choose to experiment with mind-altering drugs vs. the drug discovery process.

Sommario/riassunto

This book provides a fresh and contemporary take on the study of men and masculinity. It highlights new and exciting approaches to sexuality, desire, men and masculinity in East Asian contexts, focusing on the interconnections between them. In doing so, it re-examines the key concepts that underpin studies of masculinity, such as homophobia, homosociality and heteronormativity. Developing new ways of thinking about masculinity in local contexts, it fills a significant lacuna in contemporary scholarship. This thought-provoking work will appeal to students and scholars of gender studies, cultural studies and the wider social sciences. .
