Sommario/riassunto

This cutting-edge collection of essays presents to the reader the leading voices within food justice, environmental justice, and school-to-prison pipeline movements. While many schools, community organizers, professors, politicians, unions, teachers, parents, youth, social workers, and youth advocates are focusing on curriculum, discipline policies, policing practices, incarceration demographics, and diversity of staff, the authors of this book argue that even if all those issues are addressed, healthy food and living environment are fundamental to the emancipation of youth. This book is for anyone who wants to truly understand the school-to-prison pipeline as well as those interested in peace, social justice, environmentalism, racial justice, youth advocacy, transformative justice, food, veganism, and economic justice.
