Autore	Hasse Dag Nikolaus.
Titolo	Success and Suppression : Arabic Sciences and Philosophy in the Renaissance // Dag Nikolaus Hasse
Pubbl/distr/stampa	Cambridge, MA : , : Harvard University Press, , [2017] ©2016
ISBN	9780674973695 0674973690 9780674973664 0674973666
Descrizione fisica	1 online resource (683 pages)
Collana	I Tatti Studies in Italian Renaissance History Ser
Disciplina	940.2/1
Soggetti	Renaissance East and West Europe Civilization Arab influences Europe Intellectual life Arab influences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- List of Figures and Tables -- Preface -- Note on Terminology, Orthography, and Transliteration -- Part I. The Presence of Arabic Traditions -- 1. Introduction: Editions and Curricula -- 2. Bio-Bibliography: A Canon of Learned Men -- 3. Philology: Translators' Programs and Techniques -- Part II. Greeks versus Arabs -- 4. Materia medica: Humanists on Laxatives -- 5. Philosophy: Averroes's Partisans and Enemies -- 6. Astrology: Ptolemy against the Arabs -- 7. Conclusion -- Appendix: The Availability of Arabic Authors in Latin Editions of the Renaissance -- Abbreviations -- Notes -- Bibliography -- Acknowledgments -- Index of Names -- General Index
Sommario/riassunto	The Renaissance marked a turning point in Europe's relationship to Arabic thought. On the one hand, Dag Nikolaus Hasse argues, it was the period in which important Arabic traditions reached the peak of their influence in Europe. On the other hand, it is the time when the West began to forget, and even actively suppress, its debt to Arabic culture. Success and Suppression traces the complex story of Arabic

influence on Renaissance thought. It is often assumed that the Renaissance had little interest in Arabic sciences and philosophy, because humanist polemics from the period attacked Arabic learning and championed Greek civilization. Yet Hasse shows that Renaissance denials of Arabic influence emerged not because scholars of the time rejected that intellectual tradition altogether but because a small group of anti-Arab hard-liners strove to suppress its powerful and persuasive influence. The period witnessed a boom in new translations and multivolume editions of Arabic authors, and European philosophers and scientists incorporated-and often celebrated-Arabic thought in their work, especially in medicine, philosophy, and astrology. But the famous Arabic authorities were a prominent obstacle to the Renaissance project of renewing European academic culture through Greece and Rome, and radical reformers accused Arabic science of linguistic corruption, plagiarism, or irreligion. Hasse shows how a mixture of ideological and scientific motives led to the decline of some Arabic traditions in important areas of European culture, while others continued to flourish.
