Sommario/riassunto	In our fast-changing urban world, the impacts of social and environmental change on children are often overlooked. Children and their Urban Environment examines these impacts in detail, looking at the key activities, spaces and experiences children have and how these can be managed to ensure that children benefit from change. The authors highlight the importance of planners, architects and housing professionals in creating positive environments for children and involving them in the planning process. They argue that children?s lives are becoming simultaneously both richer and more deprived, an

Sommario/riassunto	Jean-Baptiste Say (1767-1832) was one of the first great economists to have laid down the foundations of economic science. Author of the famous Treatise on Political Economy in 1803, which was revised and re-edited on several occasions, he published numerous other works including a voluminous Complete Course in Practical Political Economy in 1828-9. He also taught political economy successively from 1815 until his death in three Parisian establishments: the Athenee, the Conservatory of Arts and Trades, and the College de France. The texts in which Say exposes his approach to political economy have not been available in the English language until now except for the fourth edition of the 'Preliminary Discourse' which serves as an introduction to the Treatise . This book presents a translation which renders his works accessible to the English speaking world. For the first time, English readers will be able to become directly immersed in Say's principal texts, where he develops his conception of political economy. Jean-Baptiste Say and Political Economy proposes a translation of a selection of eleven of Say's texts. The first three are versions of the 'Preliminary

Discourse' from the Treatise 's editions of 1803, 1814 and 1826 with the variations of the editions of 1817, 1819 and 1841. The following four texts are the opening discourses pronounced at the Conservatory in 1820 and 1828 and the College de France in 1831 and 1832. The eighth text is the 'General Considerations' which open the Complete Course in Practical Political Economy of 1828, with the variations of the 1840 re-edition. The final three texts are those Say devotes to 'the progress of political economy' in what is akin to a history of economic thought. This volume is of great importance to economic historians and people studying Jean-Baptiste Say, as well as those who are interested in economic theory and philosophy
