

1. Record Nr.	UNINA9910150308403321
Titolo	Advances in psychology research . Volume 118 // Alexandra M. Columbus, editor
Pubbl/distr/stampa	New York : , : Nova Publishers, , [2016] ©2016
ISBN	1-5361-0150-8
Descrizione fisica	1 online resource (232 pages) : illustrations
Soggetti	Psychology - Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- Chapter 1. Phenomenal Methodology: Toward an Egosyntonic Psycho-Neuro-Dynamic Model of Mental Health -- Chapter 2. How do we Identify Loneliness in Intimate Relations? -- Chapter 3. You're Smart, for a Woman: Examining Stereotypic Backhanded Compliments -- Chapter 4. The Girl Power and Ophelia Discourses: Adolescent Girls and their Wellbeing -- Chapter 5. Marital Status and Its Effect on Subjective Daytime Sleepiness in the General Population -- Chapter 6. A Study of Cognitive (Attentional Focus) and Mentalizing Comments of Maternal Speech: Relationship to Infant Birth-Order -- Chapter 7. Autobiographical Memory in Words and Pictures: Representation of Time in Personal Narratives and Photographs in 8- to 10-Year-Old Children -- Chapter 8. The Germanwings Crash: What Can We Learn From This Tragedy? -- Chapter 9. The New DSM-V, Psychopathology Plus Neuroscience and the Omics Sciences: Are We Ready for a Revolution? -- Index.
Sommario/riassunto	This book focuses on the latest developments in psychology research. The author of Chapter One contends that lucid control across states of consciousness can be used to change the negative aspects of mental processes such as nightmares, phobic anxiety, addictions, obsessive compulsive symptoms and hallucinations. Chapter Two reviews how to identify loneliness in intimate relations. Chapter Three explores stereotypic backhanded compliments. Chapter Four reviews and analyzes critically two discourses for guiding the transformation of

adolescent girls into young adults, and proposes a meta-discourse for adolescent girls that incorporates the strengths of each discourse and discusses its operationalization. Chapter Five examines the relationships between marital status and excessive daytime sleepiness (EDS) in the general population. Chapter Six aims to investigate the way in which the position of the infant in the family – in regard to birth order – is related to maternal cognitive (attentional focus) and mental state comments of young infants in spontaneous mother-infant interactions. Chapter Seven examines 8- to 10-year-old children's memory for temporal aspects of naturally occurring distinct personal events in two different contexts: autobiographical memory narratives and a personal photograph-taking paradigm. Chapter Eight speculates about the German Wings Disaster and what we can learn from such a tragedy. Chapter Nine examines the new DSM-V, psychopathology plus neuroscience and the omics sciences.
