resilience in pastoral regions in east africa and central asia; Part VI Urban planning; 17 From maladaptation to adaptation: towards a resilient urban planning paradigm; 18 Resilient territories and territorial cohesion: different origins, similar destination; 19 Insurance as maladaptation: resilience and the 'business as usual' paradox; Part VII Disaster response; 20 A different cup of tea: learning from enhancing resilience in risk prone communities.

21 Managing disaster risk and resilience in the uk: response vs. prevention in policy and practice22 'Bouncing back' to capitalism? Grassroots autonomous activism in shaping discourses of resilience and transformation following disaster; Part VIII Insecurity; 23 The politics of security-driven resilience; 24 Resilience and disaster sites: the disastrous temporality of the 'recovery-to-come'; 25 Civic resilience: securing "resilient communities" to prevent terrorism; 26 Dangerously exposed: the life and death of the resilient subject; Part IX International development.

27 Resilience and development among ultra-poor households in rural ethiopia28 Developing resilience: a retreat from grand planning; 29 Resilience and the post-colonial: hidden transcripts of resilience in Jamaican disaster management; Part X Conclusion; 30 Conclusion: international resilience and the uncertain future; Index.

Sommario/riassunto

"Resilience is increasingly discussed as a key concept across many fields of international policymaking from sustainable development and climate change, insecurity, conflict and terrorism to urban and rural planning, international aid provision and the prevention of and responses to natural and man-made disasters. Edited by leading academic authorities from a number of disciplines, this is the first handbook to deal with resilience as a new conceptual approach to understanding and addressing a range of interdependent global challenges. The Handbook is divided into nine sections: Introduction: contested paradigms of resilience; the challenges of resilience; governing uncertainty; resilience and neoliberalism; environmental concerns and climate change adaptation; urban planning; disaster risk reduction and response; international security and insecurity; the policy and practices of international development. Highlighting how resilience-thinking is increasingly transforming international policy-making and government and institutional practices, this book will be an indispensable source of information for students, academics and the wider public interested in resilience, international relations and international security."--Provided by publisher.
