systems -- III. Other non-active constructions -- IV. Dative clitics -- V. Lexical-interpretive approaches to the Albanian data -- VI. Conclusion.

Sommario/riassunto

This work, first published in 1985, is an analysis of the syntax of the Albanian verb complex. The term "verb complex" is defined here as the verb stem and its conjugational endings, together with the perfect auxiliaries and verb clitics. In a wider sense the verb includes the verb and its central arguments: subject, direct object, and indirect object. The analysis is presented in a somewhat expanded version of the relational grammar framework of Perlmutter and Postal (1977). It is argued that by assuming the existence of multiple levels in the syntactic structure of a clause, it is possible to account for the distribution of active and non-active verb forms over the various constructions of Albanian with a single generalisation. This title will be of interest to students of language and linguistics.

Nota di contenuto	Chapter 1 Civil Engineering -- Chapter 2 Hands-on Approach -- Chapter 3 Development-Import Scheme -- Chapter 4 Human Resources Development -- Chapter 5 Endogenous Development.
Sommario/riassunto	<p>This open access book explores Japanese involvement in Asian development through selected development ideas and lexemes that are widely regarded in Japan as 'untranslatable' into other languages. Each chapter traces the genealogy of locally nuanced development ideas and lexemes in Japan and the process by which they have spread across Asia and beyond through Japan's development cooperation. The Semantics of Development in Asia critically examines the diverse (Western and non-Western) roots of Japanese development ideas and lexemes and their shifting semantics, shaped by the ever-changing national/international political economies and dominant development thinking of different eras. The volume contributes to a more pluriversal approach to knowledge production in development studies through its in-depth examination of vernacular Japanese ideas. This book is useful to researchers, students and teachers in the fields of Asian studies, development studies and international relations. It is also of value to policymakers and practitioners whose professional interests include development cooperation by, and with, Asian countries.</p>
