Edizione	[First edition.]
Descrizione fisica	1 online resource (192 p.)
Disciplina	658.478
Soggetti	Computer networks - Security measures Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	As recently as five years ago, securing a network meant putting in a firewall, intrusion detection system, and installing antivirus software on the desktop. Unfortunately, attackers have grown more nimble and effective, meaning that traditional security programs are no longer effective. Today's effective cyber security programs take these best practices and overlay them with intelligence. Adding cyber threat intelligence can help security teams uncover events not detected by traditional security platforms and correlate seemingly disparate events across the network. Properly-implemented intelligence also makes the life of the security practitioner easier by helping him more effectively prioritize and respond to security incidents. The problem with current efforts is that many security practitioners don't know how to properly implement an intelligence-led program, or are afraid that it is out of their budget. Building an Intelligence-Led Security Program is the first book to show how to implement an intelligence-led program in your enterprise on any budget. It will show you how to implement a security information a security information and event management system, collect and analyze logs, and how to practice real cyber threat

intelligence. You'll learn how to understand your network in-depth so that you can protect it in the best possible way. Provides a roadmap and direction on how to build an intelligence-led information security program to protect your company. Learn how to understand your network through logs and client monitoring, so you can effectively evaluate threat intelligence. Learn how to use popular tools such as BIND, SNORT, squid, STIX, TAXII, CyBox, and splunk to conduct network intelligence.

2. Record Nr.	UNINA9910150649403321
Autore	Pimsleur
Titolo	Pimsleur English for Portuguese (Brazilian) Speakers Level 1 Lessons 6-10 : Learn to Speak and Understand English as a Second Language with Pimsleur Language Programs

ISBN	1-4423-2765-0
Lingua di pubblicazione	Inglese
Formato	Musica
Livello bibliografico	Monografia
Sommario/riassunto	Surprise your friends! Astonish your family! With Pimsleur, you'll be speaking and understanding like a native in no time. 30 minutes a day is all it takes. English for Brazilian Portuguese Speakers Phase 1, Units 6-10 build on material taught in prior units. Each lesson provides 30 minutes of spoken language practice, with an introductory conversation, and new vocabulary and structures. Detailed instructions enable you to understand and participate in the conversation. Each lesson contains practice for vocabulary introduced in previous lessons. The emphasis is on pronunciation and comprehension, and on learning to speak English. Reading Lessons begin in Unit 10 and provide you with an introduction to reading English. These lessons are designed to teach you to sound out words with correct pronunciation and accent. A

Reading Booklet to be used with the audio lessons is also included in PDF format.
