1.
Record Nr.	UNINA9910151566303321
Autore	Surana Karan S.
Titolo	The finite element method for boundary value problems : mathematics and computations / / Karan S. Surana and J.N. Reddy
Pubbl/distr/stampa	Boca Raton : , : CRC Press, , [2017] ©2017
ISBN	1-315-36571-5 1-4987-8050-4
Descrizione fisica	1 online resource (820 pages) : illustrations
Disciplina	515/.62
Soggetti	Boundary value problems - Numerical solutions Finite element method
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	1. Introduction -- 2. Concepts from functional analysis -- 3. Classical methods of approximation -- 4. The finite element method -- 5. Self-adjoint differential operators -- 6. Non-self-adjoint differential operators -- 7. Non-linear differential operators -- 8. Basic elements of mapping and interpolation theory -- 9. Linear elasticity using the principle of minimum total potential energy -- 10. Linear and nonlinear solid mechanics using the principle of virtual displacements -- 11. Additional topics in linear structural mechanics -- 12. Convergence, error estimation, and adaptivity.
