

1. Record Nr.	UNINA9910151612603321
Autore	Usher Nikki
Titolo	Interactive Journalism : Hackers, Data, and Code // Nikki Usher
Pubbl/distr/stampa	Urbana : , : University of Illinois Press, , [2016] ©2016
ISBN	0-252-09895-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (215 pages) : illustrations (black and white)
Classificazione	LAN008000SOC052000BUS070030
Disciplina	070.4
Soggetti	BUSINESS & ECONOMICS / Industries / Computer Industry SOCIAL SCIENCE / Media Studies LANGUAGE ARTS & DISCIPLINES / Journalism Journalism - Technological innovations Online journalism Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 2016.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction : interactives in the news -- Interactive journalism : a budding profession -- The rise of a subspecialty : interactive journalism -- Hacker journalists, programmer journalists, and data journalists -- Inside the interactive journalism newsroom -- Interactives and journalism's systems of knowledge -- Conclusion : interactives and the future of journalism
Sommario/riassunto	"Traditional journalism faces the growing reality that the news business model remains an unsolvable problem. Audiences can go anywhere at any time. Technological and computing advances offer opportunities to explore on web and mobile beyond what has ever been possible before, thanks to an explosion in programming knowledge. The infrastructure and experience of information delivery has evolved to seemingly erase time and space boundaries. This larger setting for news, bound up in changes to economics, technology and culture, has created the conditions for a new subspecialty of the journalism profession to emerge: interactive journalism. In Interactive Journalism, Nikki Usher brings together a comprehensive theoretical and empirical portrait of this subspecialty. Beginning with a theoretical overview of

professionalism, Usher provides a comprehensive history of fields that come together to define interactive journalism: computer assisted reporting, photojournalism and graphics. She then moves from the people behind interactive journalism to the work that these journalists do to the special abstract knowledge they provide the profession. With vignettes from across the world, she takes us from in-depth look at Al Jazeera English interactive creation to the BBC to the Guardian's data desk to the New York Times. Interactive Journalism illuminates the professions, people, work and knowledge of a subspeciality that has emerged in the age of the rise of digital culture as a possible answer to the decline and fall of traditional journalism"--
