Sommario/riassunto	For undergraduate or graduate courses in Accounting Information Systems. Core coverage of business processes, transaction cycles, and internal controls. An understanding of business processes is fundamental to contemporary auditing, and professional and legal considerations relating to an organization's internal control processes. Following a Business Process Approach, Accounting Information Systems stresses information, communication, and networking technology within the context of business processes, transaction cycles and internal control structure. The eleventh edition offers streamlined information and a new chapter covering fraud.
