Integrating Curriculum Through Thematic Planning and Projects -- Appendix: Sample Lesson Plans -- Appendix: Field Trips -- Appendix: The Big, Big Turnip -- Glossary -- References -- Index.
Sommario/riassunto	This best-selling text addresses all aspects of classroom life, including the roles of children and adults, the physical and social environments, and teaching and learning within multiple domains for children age three to eight. It provides a comprehensive, cohesive approach to curriculum development, which results in greater continuity for children and practitioners in group settings in childcare, preschool, and the early elementary grades. Concentrating as much on the "how" of curriculum development as on the "what and why," the authors provide practical, research-based guidelines for translating theory into best practice that accommodates age-appropriateness, individual differences, and social and cultural diversity. Students learn how to

conceptualize, plan, implement, and evaluate curriculum through  
detailed application opportunities in each chapter.
