

1. Record Nr.	UNINA9910153091103321
Autore	Bledsoe Bryan E. <1955->
Titolo	Anatomy & physiology for emergency care // Bledsoe [and three others]
Pubbl/distr/stampa	Harlow, England : , : Pearson, , [2014] ©2014
ISBN	1-292-05200-7
Edizione	[Second, pearson new international edition.]
Descrizione fisica	1 online resource (859 pages) : illustrations (some color), tables
Collana	Always Learning
Disciplina	616.025
Soggetti	Emergency medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Cover -- Table of Contents -- Glossary.
Sommario/riassunto	Based upon the popular college text Essentials of Anatomy and Physiology, 4e by Fredric H. Martini and Edwin F. Bartholomew, Dr. Bledsoe has taken this work and added clinical correlations and applications specific to emergency care. Anatomy & Physiology for Emergency Care 2e presents material in a clear, concise format and places emphasis on essential fundamental concepts, applications and terminology. Innovative EMS content and pedagogical elements make this an excellent choice for brief A&P courses that build a foundation of essential knowledge in human anatomy and physiology. This material provides a framework for interpreting and applying information that can be used in problem-solving, as well as an introduction to common injuries and illnesses in a manner that will reinforce basic anatomy and physiology principles.
