

1. Record Nr.	UNINA9910153116303321
Autore	Goodrich Michael T.
Titolo	Introduction to computer security / / Michael T. Goodrich, Roberto Tamassia
Pubbl/distr/stampa	Harlow, England : , : Pearson Education Limited, , [2014] Â©2014
ISBN	1-292-03791-1
Edizione	[First edition.]
Descrizione fisica	1 online resource (514 pages) : illustrations
Collana	Always learning
Disciplina	005.8
Soggetti	Computer security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Table of Contents -- 1. Introduction -- 2. Physical Security -- 3. Operating Systems Security -- 4. Malware -- 5. Network Security I -- 6. Network Security II -- 7. Web Security -- 8. Cryptography -- 9. Distributed-Applications Security -- 10. Bibliography -- Index.
Sommario/riassunto	For computer-security courses that are taught at the undergraduate level and that have as their sole prerequisites an introductory computer science sequence (e.g., CS 1/CS 2). A new Computer Security textbook for a new generation of IT professionals. Unlike most other computer security textbooks available today, Introduction to Computer Security, 1e does NOT focus on the mathematical and computational foundations of security, and it does not assume an extensive background in computer science. Instead it looks at the systems, technology, management, and policy side of security, and offers students fundamental security concepts and a working knowledge of threats and countermeasures with "just-enough" background in computer science. The result is a presentation of the material that is accessible to students of all levels.
