ISBN	1000022235
Descrizione fisica	1 electronic resource (XII, 176 p. p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In this work, an intelligent human-machine interface (HMI) for human worker activity recognition in industrial environments is presented. The interface consists of components for robust and accurate 3D position estimation in workspace environments, the recognition of task-related worker activities and human-computer interaction via gestures. All components of the presented HMI are flexible with respect to applications and can be transferred to other activity recognition problems, as well.

Sommario/riassunto	While the fall of the Berlin Wall is positively commemorated in the West, the former Soviet Bloc has a more complicated view of its legacy. In post-communist Eastern Europe, the way people remember state socialism is closely intertwined with the manner in which they envision historical justice. This book is concerned with the explosion of a politics of memory triggered by the fall of state socialism in Eastern Europe, and it takes a comparative look at the ways that communism and its demise have been commemorated (or not commemorated) by major political actors across the region.
