The northern crusaders : the logistics of English and other Northern crusader fleets / Richard W. Unger -- chapter 14. Digest / John H.

Pryor.

Sommario/riassunto

How were the Crusades made possible? There have been studies of ancient, medieval and early modern warfare, as well as work on the finances and planning of Crusades, but this volume is the first specifically to address the logistics of Crusading. Building on previous work, it brings together experts from the fields of medieval Western, Byzantine and Middle Eastern studies to examine how the marches and voyages were actually made. Questions of manpower, types and means of transportation by land and sea, supplies, financial resources, roads and natural land routes, sea lanes and natural sailing routes - all these topics and more are covered here. Of particular importance is the attention given to the horses and other animals on which transport of supplies and the movement of armies depended.
