

1. Record Nr.	UNINA9910154602703321
Autore	Johansson Lars-Goran
Titolo	Interpreting Quantum mechanics : a realistic view in Schrodinger's vein // Lars-Goran Johansson
Pubbl/distr/stampa	London : , : Routledge, , 2016
ISBN	1-351-92641-1 1-138-26526-8 1-315-25189-2
Descrizione fisica	1 online resource (208 pages) : illustrations, tables
Disciplina	530.12
Soggetti	Quantum theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	First published 2007 by Ashgate Publishing.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Interpretative problems in Quantum mechanics -- 2. Realism and understanding -- 3. Individuation and identity in the Quantum world -- 4. Quantum objects are waves -- 5. Particle behaviour of waves -- 6. The measurement problem -- 7. Quantum mechanical spin -- 8. Non-locality -- 9. Gentle criticism -- 10. Summary and conclusions.
Sommario/riassunto	Presenting a realistic interpretation of quantum mechanics and, in particular, a realistic view of quantum waves, this book defends, with one exception, Schrodinger's views on quantum mechanics. Johansson goes on to defend the view that the collapse of a wave function during a measurement is a real physical collapse of a wave and argues that the collapse is a consequence of quantisation of interaction. Lastly Johansson argues for a revised principle of individuation in the quantum domain and that this principle enables a sort of explanation of non-local phenomena.
