Sommario/riassunto	What is lost in translation may be a war, a world, a way of life. A unique look into the nineteenth-century clash of empires from both sides of the earthshaking encounter, this book reveals the connections between international law, modern warfare, and comparative grammar--and their influence on the shaping of the modern world in Eastern and Western terms. The Clash of Empires brings to light the cultural legacy of sovereign thinking that emerged in the course of the violent meetings between the British Empire and the Qing Dynasty (1644-1911). Lydia Liu demonstrates how the collision of imperial will and competing interests, rather than the civilizational attributes of existing nations and cultures, led to the invention of "China," "the East," "the West," and the modern notion of "the world" in recent history. Drawing

on her archival research and comparative analyses of English--and Chinese--language texts, as well as their respective translations, she explores how the rhetoric of barbarity and civilization, friend and enemy, and discourses on sovereign rights, injury, and dignity were a central part of British imperial warfare. Exposing the military and philological--and almost always translingual--nature of the clash of empires, this book provides a startlingly new interpretation of modern imperial history.

-- 3. The situation in the United Kingdom : overview -- 4. The worldwide situation : overview -- 5. The disaster control plan -- 6. Findings : key themes -- 7. Planning for the future -- 8. Sources of information.

Sommario/riassunto

This important book assesses the current state of disaster management in archives, libraries and museums in the UK and around the world, and provides recommendations for addressing current and future threats. Following an introductory outline of the topic and terminology, the authors provide a short history of the development of disaster management in the cultural heritage sector. They illustrate a basic framework for effective disaster management by reviewing disaster control plan practice from around the world. Through examining and identify the key issues affecting disaster management in archives, libraries and museums, the authors discuss a priority structure for future implementation. This book will be key reading for scholars and students of archive studies, library and information and museum management. It will also be extremely useful for professionals and policy makers involved in disaster management planning at a local and national level.
