Planning cultures in Southern Europe -- pt. 5. Interdependencies between European spatial policies and planning cultures -- pt. 6. Conclusions.

Sommario/riassunto

Bringing together an interdisciplinary team from across the EU, this book connects elements of cultural and planning theories to explain differences and peculiarities among EU member states. A 'culturized planning model' is introduced to consider the 'rules of the game': how culture affects planning practices not only on an explicit 'surface' but also on a 'hidden' implicit level. The model consists of three analytical dimensions: 'planning artifacts', 'planning environment' and 'societal environment'. This book adopts these dimensions to compare planning cultures of different European countries. This sheds light not only on the organizational or institutional structure of planning, but also the influence of deeper cultural values and layers on planning and implementation processes.
