Sommario/riassunto	Written by world-renowned Clinical Pharmacologist, Dr. Thomas Hale, and assisted by Dr. Hilary Rowe, this drug reference provides everything that is known about the transfer of various medications into human milk, the use of radiopharmaceuticals, the use of chemotherapeutic agents, and vaccines in breastfeeding mothers. Medications and Mothers' Milk is the worldwide-best-selling drug reference on the use of medications in breastfeeding mothers, providing you the most current, complete, and evidence-based information. Extensively updated throughout, the 17th Edition includes hundreds of new drugs, diseases, vaccines, and syndromes. The appendices provide information on radioactive drugs and tests, and over-the-counter drugs. -- Provided by publisher.
