Fidler -- The future of global financing for infectious diseases / Jen Kates and Adam Wexler -- International public-private partnerships as part of the solution to infectious disease threats : operational, legal, and governance considerations / Kevin A. Klock -- Global vaccine access as a critical intervention to fight infectious disease, antibiotic resistance, and poverty / Seth Berkley -- Bridging the gap between biomedical innovation and access to treatments to fight infectious disease / Veronica Miller -- Ethical challenges in the development and deployment of medical therapies and vaccines in the context of public |

health emergencies / Annick Antierens -- Evidence, strategies, and challenges for assuring vaccine availability, efficacy, and safety / Saad Omer and Sam Halabi -- An HIV vaccine / Mary Marovich -- Isolation, quarantine and infectious disease threats arising from global migration / Martin Cetron -- Epilogue / Renee Fox.

Sommario/riassunto

This work unites the insights of ebola's first responders with those the world's foremost experts in law, economics, vaccine development, and global migration to identify missed opportunities from the Ebola crisis - and to apply these lessons to emerging infectious disease threats.
