

1. Record Nr.	UNINA9910154752403321
Autore	Speer Eugene R.
Titolo	Generalized Feynman Amplitudes. (AM-62), Volume 62 / / Eugene R. Speer
Pubbl/distr/stampa	Princeton, NJ : , : Princeton University Press, , [2016] ©1969
ISBN	1-4008-8186-2
Descrizione fisica	1 online resource (233 pages)
Collana	Annals of Mathematics Studies ; ; 250
Disciplina	530.14/3
Soggetti	Mathematical physics Quantum field theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Acknowledgements -- Abstract -- tables of contents -- Introductions -- CHAPTER I. Renormalization in Lagrangian Field Theory -- CHAPTER II. Definition of Generalized Amplitudes -- CHAPTER III. Analytic Renormalization -- CHAPTER IV. Summation of Feynman Amplitudes -- CONCLUSION -- APPENDIX A. Graphs -- APPENDIX B. Distributions -- APPENDIX C. The Free Field -- BIBLIOGRAPHY
Sommario/riassunto	This book contains a valuable discussion of renormalization through the addition of counterterms to the Lagrangian, giving the first complete proof of the cancellation of all divergences in an arbitrary interaction. The author also introduces a new method of renormalizing an arbitrary Feynman amplitude, a method that is simpler than previous approaches and can be used to study the renormalized perturbation series in quantum field theory.
