

1. Record Nr.	UNINA9910154772003321
Autore	Croft Anthony
Titolo	Mathematics for engineers // Anthony Croft, Robert Davison
Pubbl/distr/stampa	Harlow, England : , : Pearson Prentice Hall, , 2015
Edizione	[Fourth edition.]
Descrizione fisica	1 online resource (1,217 pages) : illustrations (some color), tables, graphs
Disciplina	624.076
Soggetti	Engineering mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Cover -- Title -- Copyright -- Contents -- Publisher's acknowledgements -- Preface -- Using mathematical software packages -- 1 Arithmetic -- Block 1 Operations on numbers -- Block 2 Prime numbers and prime factorisation -- End of chapter exercises -- 2 Fractions -- Block 1 Introducing fractions -- Block 2 Operations on fractions -- End of chapter exercises -- 3 Decimal numbers -- Block 1 Introduction to decimal numbers -- Block 2 Significant figures -- End of chapter exercises -- 4 Percentage and ratio -- Block 1 Percentage -- Block 2 Ratio -- End of chapter exercises -- 5 Basic algebra -- Block 1 Mathematical notation and symbols -- Block 2 Indices -- Block 3 Simplification by collecting like terms -- Block 4 Removing brackets -- Block 5 Factorisation -- Block 6 Arithmetic of algebraic fractions -- Block 7 Formulae and transposition -- End of chapter exercises -- 6 Functions and mathematical models -- Block 1 Basic concepts of functions -- Block 2 The graph of a function -- Block 3 Composition of functions -- Block 4 One-to-one functions and inverse functions -- Block 5 Parametric representation of a function -- Block 6 Describing functions -- Block 7 The straight line -- Block 8 Common engineering functions -- End of chapter exercises -- 7 Polynomial equations, inequalities, partial fractions and proportionality -- Block 1 Solving linear equations -- Block 2 Solving quadratic equations -- Block 3 Factorising polynomial expressions and solving polynomial equations -- Block 4 Solving simultaneous equations -- Block 5 Solution of inequalities -- Block 6 Partial fractions -- Block 7 Proportionality --

End of chapter exercises -- 8 Logarithms and exponentials -- Block 1
The exponential function -- Block 2 Logarithms and their laws -- Block
3 Solving equations involving logarithms and exponentials -- Block 4
Applications of logarithms.

End of chapter exercises -- 9 Trigonometry -- Block 1 Angles -- Block
2 The trigonometrical ratios -- Block 3 The trigonometrical ratios in all
quadrants -- Block 4 Trigonometrical functions and their graphs --
Block 5 Trigonometrical identities -- Block 6 Trigonometrical equations
-- Block 7 Engineering waves -- End of chapter exercises -- 10 Further
trigonometry -- Block 1 Pythagoras's theorem and the solution of
right-angled triangles -- Block 2 Solving triangles using the sine rule
-- Block 3 Solving triangles using the cosine rule -- Block 4 Surveying
-- Block 5 Resolution and resultant of forces -- End of chapter
exercises -- 11 Complex numbers -- Block 1 Arithmetic of complex
numbers -- Block 2 The Argand diagram and polar form of a complex
number -- Block 3 The exponential form of a complex number -- Block
4 De Moivre's theorem -- Block 5 Solving equations and finding roots
of complex numbers -- Block 6 Phasors -- End of chapter exercises --
12 Matrices and determinants -- Block 1 Introduction to matrices --
Block 2 Multiplication of matrices -- Block 3 Determinants -- Block 4
The inverse of a matrix -- Block 5 Computer graphics -- End of
chapter exercises -- 13 Using matrices and determinants to solve
equations -- Block 1 Cramer's rule -- Block 2 Using the inverse matrix
to solve simultaneous equations -- Block 3 Gaussian elimination --
Block 4 Eigenvalues and eigenvectors -- Block 5 Iterative techniques --
Block 6 Electrical networks -- End of chapter exercises -- 14 Vectors
-- Block 1 Basic concepts of vectors -- Block 2 Cartesian components
of vectors -- Block 3 The scalar product, or dot product -- Block 4 The
vector product, or cross product -- Block 5 The vector equation of a
line and a plane -- End of chapter exercises -- 15 Differentiation --
Block 1 Interpretation of a derivative -- Block 2 Using a table of
derivatives.

Block 3 Higher derivatives -- End of chapter exercises -- 16
Techniques and applications of differentiation -- Block 1 The product
rule and the quotient rule -- Block 2 The chain rule -- Block 3 Implicit
differentiation -- Block 4 Parametric differentiation -- Block 5
Logarithmic differentiation -- Block 6 Tangents and normals -- Block 7
Maximum and minimum values of a function -- End of chapter
exercises -- 17 Integration -- Block 1 Integration as differentiation in
reverse -- Block 2 Definite integrals -- Block 3 The area bounded by a
curve -- Block 4 Computational approaches to integration -- Block 5
Integration by parts -- Block 6 Integration by substitution -- Block 7
Integration using partial fractions -- Block 8 Integration of
trigonometrical functions -- End of chapter exercises -- 18

Applications of integration -- Block 1 Integration as the limit of a sum
-- Block 2 Volumes of revolution -- Block 3 Calculating centres of
mass -- Block 4 Moment of inertia -- Block 5 The length of a curve and
the area of a surface of revolution -- Block 6 The mean value and root-
mean-square value of a function -- End of chapter exercises -- 19

Sequences and series -- Block 1 Sequences and series -- Block 2 Sums
of whole numbers, their squares and cubes -- Block 3 Pascal's triangle
and the binomial theorem -- Block 4 Taylor series and Maclaurin series
-- End of chapter exercises -- 20 Differential equations -- Block 1
Basic concepts of differential equations -- Block 2 Separation of
variables -- Block 3 Solving first-order linear equations using an
integrating factor -- Block 4 Computational approaches to differential
equations -- Block 5 Second-order linear constant-coefficient
equations I -- Block 6 Second-order linear constant-coefficient

equations II -- End of chapter exercises -- 21 Functions of more than one variable and partial differentiation.

Block 1 Functions of two independent variables, and their graphs --

Block 2 Partial differentiation -- Block 3 Higher-order derivatives --

Block 4 Stationary values of a function of two variables -- End of chapter exercises -- 22 The Laplace transform -- Block 1 The Laplace transform -- Block 2 The inverse Laplace transform -- Block 3 Solving differential equations using the Laplace transform -- End of chapter exercises -- 23 Statistics and probability -- Block 1 Data -- Block 2 Data averages -- Block 3 Variation of data -- Block 4 Elementary probability -- Block 5 Laws of probability -- Block 6 Probability distributions -- Block 7 The binomial distribution -- Block 8 The Poisson distribution -- Block 9 The normal distribution -- End of chapter exercises -- 24 An introduction to Fourier series and the Fourier transform -- Block 1 Periodic waveforms and their Fourier representation -- Block 2 Introducing the Fourier transform -- End of chapter exercises -- Typical examination papers -- Appendix 1: SI units and prefixes -- Index.

Sommario/riassunto

Were you looking for the book with access to MyMathLab Global? This product is the book alone, and does NOT come with access to MyMathLab Global. Buy Mathematics for Engineers, 4e by Croft with MyMathLab Global access card 4e (ISBN 9781292077765) if you need access to the MyLab as well, and save money on this brilliant resource. Understanding key mathematical concepts and applying them successfully to solve problems are vital skills that all engineering students must acquire. Mathematics for Engineers teaches, develops and nurtures those skills. Practical, informal and accessible, it begins with the foundations and gradually builds upon this knowledge as it introduces more complex concepts to cover all requirements for a first year engineering maths course, together with introductory material for even more advanced topics. Need extra support? This product is the book alone, and does NOT come with access to MyMathLab Global. This title can be supported by MyMathLab Global, an online homework and tutorial system which can be used by students for self-directed study or fully integrated into an instructor's course. You can benefit from MyMathLab Global at a reduced price by purchasing a pack containing a copy of the book and an access card for MyMathLab Global: Mathematics for Engineers with MyMathLab Global access card 4e (ISBN 9781292077765). Alternatively, buy access to MyMathLab Global and the eText - an online version of the book - online at www.mymathlabglobal.com. For educator access, contact your Pearson Account Manager. To find out who your account manager is, visit www.pearsoned.co.uk/relocator.
