the Standard Pricing Procedures -- 8.2.1 Condition Types EDI1/EDI2 (Customer Expected Price) -- 8.2.2 Condition Types RL00/MW15 (Invoice List Conditions) -- 8.2.3 Condition Types SKTV/SKTO (Cash Discount)) -- 8.2.4 Condition Type HM00 (Order Value) -- 8.2.5 Condition Types AMIW/AMIZ (Minimum Sales Order Value/Minimum Value Surcharge) -- 8.2.6 Condition Type AZWR (Down Payment/Settlement) -- 8.2.7 Condition Type GRWR (Statistical Value (Cross-Border)) -- 8.3 Summary -- Part III Advanced Techniques, Tips, and Tricks -- 9 Special Features of the Condition Technique in Pricing -- 9.1 Interfaces, Tables, and Interrelationships -- 9.1.1 Interfaces to Condition Tables and Master Data Maintenance -- 9.1.2 Interfaces to the Pricing Modules -- 9.1.3 Internal Structures and Tables of the Pricing Programs -- 9.1.4 Field Sequence in the Condition Table -- 9.2 Data Determination via Condition Technique -- 9.2.1 Variant 1: Data Determination Within the Access: Used in Subsequent Access -- 9.2.2 Variant 2: Data Determination in the Access, Transfer to Document Item via Requirement -- 9.2.3 Transfer from Condition Record via Formula or Requirement -- 9.2.4 Variant 3: Transfer to XKOMV from Condition Record via Formula. 9.2.5 Variant 4: Transfer to KOMK from Condition Record via Requirement.

Sommario/riassunto

Wrap your head around pricing and the condition technique with this nuts-and-bolts guide! First become versed in the fundamentals: condition types, master data settings, and condition lists. Then employ standard configurations, from condition records to pricing in sales documents. Use function modules, deploy user exits, and create custom workarounds to pick the right price for your products!

Fundamentals Walk step by step through the essential elements of the condition technique and see how condition records, tables, and types form the basis of your calculation. Then set up condition master data and filter condition records with condition lists. Standard Configuration Learn to create a condition table and access sequence, maintain a release status, handle pricing in sales documents, and determine taxes. Advanced Techniques Want to implement data determination via the condition technique? Handle freight surcharges? Add a second or third subtotal field? Kick your pricing practices up a notch with advanced techniques! Highlights: Condition technique Pricing SAP ERP Materials Management (MM) Sales and Distribution (SD) Master data Function modules User exits Configuration Performance and testing Rebate processing
