

1. Record Nr.	UNINA9910154868603321
Autore	Marquardt Jens.
Titolo	How power shapes energy transitions in Southeast Asia : a complex governance challenge / / Jens Marquardt
Pubbl/distr/stampa	London ; ; New York : , : Routledge, , 2017
ISBN	1-315-55926-9 1-317-19468-3 1-317-19467-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (281 pages)
Collana	Routledge Studies in Energy Transitions
Disciplina	333.790959
Soggetti	Energy policy - Environmental aspects - Southeast Asia Energy development - Southeast Asia Renewable energy sources - Southeast Asia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	pt. I. Introduction -- pt. II. Development cooperation for sustainable energy -- pt. III. Setting the scene : theory and analytical framework -- pt. IV. The Philippines -- pt. V. Indonesia -- pt. VI. Conclusions.
Sommario/riassunto	An understanding of the role of energy-related governance systems and the conditions required for a shift towards renewables in developing countries is urgently needed in order to tap into the global potential of low-carbon development. Although renewable energy sources have become technically feasible and economically viable, social and political factors continue to persist as the most critical obstacles for their dissemination. How Power Shapes Energy Transitions in Southeast Asia conceptualizes power for the field of sustainable energy governance. Based on empirical findings from the Philippines and Indonesia, the book develops an analytical approach that incorporates power theory into a multi-level governance framework. The book begins with a profound background on renewable energy development around the world and presents major trends in development cooperation. A power-based multi-level governance approach is introduced that is rooted in development thinking. Examining how coordination and power relations shape the

development and dissemination of renewable energy technologies, the book also shows how decentralization affects low carbon development in emerging economies. Sparking debate on the ways in which energy transitions can be triggered and sustained in developing countries, this book will be of great interest to students and scholars of renewable energy development and environmental politics and governance as well as practitioners in development cooperation.
