Sommario/riassunto

This work provides a comprehensive and multi-faceted account of the Reformation in eastern and central Europe, drawing on extensive archival research carried out by Continental and British scholars. Across a broad thematic, temporal and geographical range, the contributors examine the cultural impact of the Reformation in Eastern Europe, the encounters between different confessions, and the blend of religious and political pressures which shaped the path of Reformation in these lands. By making the fruits of their research accessible to a wider audience, the contributors hope to emphasise the important role of eastern and central Europe on the early modern European scene.
