

1. Record Nr.	UNINA9910155032803321
Autore	Pozzulo Joanna
Titolo	The young eyewitness : how well do children and adolescents describe and identify perpetrators? // Joanna Pozzulo
Pubbl/distr/stampa	Washington, DC : , : American Psychological Association, , 2017
ISBN	1-4338-2293-8
Descrizione fisica	1 online resource (viii, 207 pages)
Disciplina	363.25/8
Soggetti	Child witnesses - United States Forensic child psychology - United States Forensic Psychiatry Psychology, Child
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 173-195) and index.
Nota di contenuto	Overview of forensic concepts -- Ability of young eyewitnesses to describe a person -- Techniques to improve the amount and accuracy of recall information -- Effects of lineup construction and procedures -- Other factors influencing the young eyewitness' identification accuracy -- Why recall and identification in young eyewitnesses differs from that of adult eyewitnesses -- Relation between describing the perpetrator and identifying the perpetrator -- Jurors' perceptions of the young eyewitness -- Policy implications -- Future directions for young eyewitness research.
Sommario/riassunto	"Every year, numerous crimes occur involving child eyewitnesses. In some cases, children are the only eyewitnesses, which makes them especially critical for solving the cases. But how reliable is child eyewitness evidence? This book summarizes the research on how well children can describe an event and perpetrator (which is a recall task) and how well they can identify the perpetrator in person or in photographs (which is a recognition task). It shows that although children may be less advanced in these skills than adults, they nonetheless can provide invaluable evidence. Pozzulo interprets the research in light of developmental theories, and notes practical implications for forensic investigations. In particular, the chapters

highlight interviewing techniques to facilitate accurate recall and lineup techniques to facilitate accurate recognition. This book is an essential resource for all forensic investigators"--Publicity materials.
