Sommario/riassunto	The pervasive effects of maltreatment on child development can be repaired when parents use effective, empirically validated, and evidence-based methods. This book describes a comprehensive approach to parenting and discusses a variety of issues including

attachment, trauma, neuro-psychological impairments, sensory-integration, and treatment approaches as well as the use of media, play, and narratives to create connections. The book will be useful to child welfare and residential treatment professionals as well as professors teaching family-therapy, child-welfare, and child-treatment courses.

Sommario/riassunto	After World War II, 154,000 Germans were arrested by the Soviet secret police and held incommunicado in so-called special camps in the Soviet occupation zone. One third of the inmates did not survive captivity. Based on Russian and German sources, Displaced Terror: History and Perception of Soviet Special Camps in Germany offers a multi-layered account of this chapter of Stalinist persecution and mass violence, which has largely been suppressed to this day. The reasons for this gap in German memory culture are also addressed.<b
