Nota di contenuto	Introduction -- Ireland -- Spain -- Sweden -- Norway -- Denmark -- The Netherlands -- UK -- Romania -- Hungary -- Switzerland -- Germany -- Conclusions.
Sommario/riassunto	Since the start of the 21st century, urban communities have faced increasing challenges in housing affordability, with environmental issues causing additional concern. It is clear that changes to urban housing are needed to enhance the resilience of cities and improve the economic, social and physical well-being of residents. This book provides a comparative cross-national perspective on urban housing and sustainability in Europe, exploring the key barriers and drivers associated with sustainable urban development and community regeneration. Students, researchers and professionals with an interest in sustainable housing creation and regeneration will find this book an invaluable reference.
