Edizione	[1st ed.]
Descrizione fisica	1 online resource (187 pages)
Collana	Human Factors & Aging Series
Disciplina	004.084/6
Soggetti	Computers and older people Internet and older people Retirement communities - Activity programs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	chapter 1. Introduction and purpose -- chapter 2. Continuing care retirement communities and the need for technology training -- chapter 3. A prototype study -- chapter 4. Complexities of and best practices for implementing technology training in continuing care retirement communities -- chapter 5. Value of technology training -- chapter 6. Recruiting and retaining older adults in technology training programs -- chapter 7. Training decisions -- chapter 8. Current needs for technological access and use in continuing care retirement communities -- chapter 9. The future of technology use among older adults in continuing care retirement communities -- chapter 10. Conclusions and final thoughts.
Sommario/riassunto	This book provides the latest research and design-based recommendations for how to design and implement a technology training program for older adults in Continuing Care Retirement Communities (CCRCs). The approach in the book concentrates on providing useful best practices for CCRC owners, CEOs, activity directors, as well as practitioners and system designers working with

older adults to enhance their quality of life. Educators studying older adults will also find this book useful. Although the guidelines are couched in the context of CCRCs, the book will have broader-based implications for training older adults on how to use computers, tablets, and other technologies.
