Titolo	Energy Efficiency Clauses in Charter Party Agreements : Legal and Economic Perspectives and their Application to Ocean Grain Transport / / by George Adamantios Psarros
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-50265-4
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XXXVII, 175 p. 111 illus., 17 illus. in color.)
Collana	Springer Series on Naval Architecture, Marine Engineering, Shipbuilding and Shipping, , 2194-8445 ; ; 3
Disciplina	343.0965
Soggetti	Engineering economy Energy policy International law Trade Game theory Engineering Economics, Organization, Logistics, Marketing Energy Policy, Economics and Management International Economic Law, Trade Law Game Theory, Economics, Social and Behav. Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Qualitative Part -- Quantitative Part -- Epilogue.
Sommario/riassunto	This book provides practical solutions for addressing energy efficiency as a clause term within a charter party contract. For this, upon a reflection of the regulatory craft, it analyzes key concepts of case law, and discusses them together with commercial and economic principles. In this way, the book aims at offering a comprehensive, interdisciplinary view of the chartering process, together with a new approach for safeguarding energy efficiency investments. A special emphasis is given to the maritime industry. Here, the newly developed framework, based on game theory, has been successfully applied to demonstrate the importance of including a clause term in contract negotiation to achieve protection against both an uncertain market and

an even more challenging shipping environment. The book not only fills a gap in the literature, covering a topic that has been largely neglected to date, yet it offers researchers and practitioners extensive information to change the chartering process radically.
