

1. Record Nr.	UNINA9910155334803321
Titolo	Contemporary Oral Oncology : Biology, Epidemiology, Etiology, and Prevention // edited by Moni Abraham Kuriakose
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-14911-3
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XIV, 541 p. 88 illus., 78 illus. in color.)
Disciplina	617.522059
Soggetti	Oral surgery Maxillofacial surgery Dentistry Surgical oncology Oral and Maxillofacial Surgery Surgical Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Oral Carcinogenesis -- Biologic Basis of Personalized Therapy in Oral Cancer -- Etiology of Oral Cancer -- Human Papilloma Virus -- Epidemiology of Oral Cancer -- Histopathology Malignant and Premalignant Oral Cavity Neoplasms -- Screening for Oral Cavity Cancer -- Advances in Early Detection and Diagnostic Adjuncts in Oral Cavity Cancer -- Oral Submucous Fibrosis -- Oral Potentially Maglignant Lesions: Classification and Comprehensive Management.
Sommario/riassunto	This is the first of four volumes that together offer an authoritative, in-depth reference guide covering all aspects of the management of oral cancer from a multidisciplinary perspective and on the basis of a strong scientific foundation. This volume, on tumor biology, epidemiology, etiology, emerging role of cancer stem cells and prevention of oral cancer, opens by discussing oral carcinogenesis in general and the role of particular carcinogens and human papillomavirus. Global epidemiology and changes in disease prevalence are then addressed. Up-to-date information is provided on emerging cancer biomarkers,

and the biologic basis of personalized therapy is explained. Histopathological features of malignant and premalignant neoplasms and their relevance to management are described. Further chapters focus on the current status of chemoprevention, the management of oral submucous fibrosis, and the value of various diagnostic adjuncts. The volume concludes by critically evaluating the efficacy of oral screening methods.
