Sommario/riassunto

Die narratologische Erforschung deutschsprachigen, heldenepischen Erzählens im Mittelalter steckt noch in den Kinderschuhen. Konsequentermaßen verfehlen die Konjunkturen moderner Erzählforschung und ihre Instrumente die entsprechenden Texte. Begründungen dafür liefern bekannte Einwände: Inwieweit müssen die primär an modernen Texten entwickelten Modelle zunächst historisiert werden? Ist von ihrer Anwendung auf heldenepische Texte überhaupt ein relevanter interpretatorischer Mehrwert zu erwarten? Solchen Fragen widmete sich 2016 eine Dresdner Tagung zum Erzählen in mittelhochdeutscher Heldenepik, deren Ergebnisse dieser Band versammelt. In exemplarischen Textanalysen schließen die Beiträge heldenepisches Erzählen auf und reflektieren Potentiale und Grenzen narratologischer Theoriebildung. Das Gravitationszentrum der Diskussion bildet dabei die narratologische Leitdifferenz von *histoire* und *discours*. Sie wird hier freilich nicht allein als kategoriale Bestimmung gefasst. Vielmehr diskutieren und konzeptualisieren die einzelnen Beiträge den begrifflichen Zusammenhang immer wieder und auf unterschiedliche Art und Weise neu. Sie machen dadurch das Konzept ‚Narratologie‘ allererst systematisch befragbar.

Nota di contenuto	"Empowered with information I have influenced a lot of people" : the quest for behavioral change -- "People are dying, but they don't listen when we tell them" : the corporate response to HIV/AIDS in South Africa -- "For the love of people" : peer education as a response from below -- Backstage social divisions -- Slipping out of order -- To speak with one voice -- Social space, leadership, and action : peer education and behavioral change.
Sommario/riassunto	Changing the Course of AIDS is an in-depth evaluation of a new and exciting way to create the kind of much-needed behavioral change that could affect the course of the global health crisis of HIV/AIDS. This case study from the South African HIV/AIDS epidemic demonstrates that regular workers serving as peer educators can be as—or even more—

effective agents of behavioral change than experts who lecture about the facts and so-called appropriate health care behavior. After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities, David Dickinson describes the promise of this grassroots intervention—workers educating one another in the workplace and community—and the limitations of traditional top-down strategies. Dickinson's book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is. We see what it means when workers directly tackle the kinds of sexual, gender, religious, ethnic, and broader social and political taboos that make behavior change so difficult, particularly when that behavior involves sex and sexuality. Dickinson's findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators. In this book we see why peer education has so much to offer societies grappling with the HIV/AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity, alcoholism, and substance abuse have so much to learn from the South African example.

Sommario/riassunto	This book constitutes the refereed proceedings of the 33rd International Conference on Computer Safety, Reliability, and Security, SAFECOMP 2014, held in Florence, Italy, in September 2014. The 20 revised full papers presented together with 3 practical experience reports were carefully reviewed and selected from 85 submissions. The papers are organized in topical sections on fault injection techniques,

verification and validation techniques, automotive systems, coverage models and mitigation techniques, assurance cases and arguments, system analysis, security and trust, notations/languages for safety related aspects, safety and security.
