Sommario/riassunto	"'Hydrodynamics of Time-Periodic Groundwater Flow' introduces the emerging topic of periodic fluctuations in groundwater. While classical hydrology has often focused on steady flow conditions, many systems display periodic behavior due to tidal, seasonal, annual, and human influences. Describing and quantifying subsurface hydraulic responses to these influences may be challenging to those who are unfamiliar with periodically forced groundwater systems. The goal of this volume is to present a clear and accessible mathematical introduction to the basic and advanced theory of time-periodic groundwater flow, which is essential for developing a comprehensive knowledge of groundwater hydraulics and groundwater hydrology" -- Provided by publisher.

Sommario/riassunto

Jacques Waardenburg writes about relations between Muslims and adherents of other religions. After illuminating various aspects of Islam from an outside point of view in his volume "Islam" (published in 2002 by de Gruyter) his second volume changes the perspective: The author shows how Muslims perceived non-Muslims - particularly Christianity and "the West", but also Judaism and Asian religions - in many centuries of religious dialogue and tensions. The main focus is on Muslim minorities in Western countries and on religious dialogues of which he provides first-hand knowledge through his participation in several important dialogue meetings. After 50 years of research and personal involvement, Waardenburg aims at a mutual understanding and reconciliation of Islam and other religions, particularly Christianity, both on an international level as well as on a more local level where "old" and "new", Christian and Muslim Europeans live together.
