1.	Record Nr.	UNINA9910156195603321
	Autore	Moore Michelle
	Titolo	Cybersecurity breaches and issues surrounding online threat protection / / Michelle Moore, George Mason University, USA, editor
	Pubbl/distr/stampa	Hershey, Pennsylvania : , : Information Science Reference, , [2017] 2017
	Descrizione fisica	1 online resource (xxi, 408 pages) : color illustrations, charts
	Collana	Advances in Information Security, Privacy, and Ethics (AISPE) Book Series, , 1948-9749
	Disciplina	005.8
	Soggetti	Computer crimes - Prevention Cyberterrorism - Prevention Computer security
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	An exploration regarding issues in insider threat / Jaeung Lee [and 3 others] -- The development of cybersecurity policy and legislative landscape in Latin America and Caribbean states / Indianna D. Minto-Coy, M. Georgia Gibson Henlin -- Internet pharmacy cybercrime: state policy mitigating risks 2000-2015 / Mary Schmeida, Ramona S. McNeal -- Identifying and analyzing the latent cyber threats in developing economies / Atul Bamrara -- Cybercrime investigation / Sujitha S., Parkavi R. -- Cybercrimes via virtual currencies in international business / Dincer Atli -- Cybersecurity and data breaches at schools / Libi Shen, Irene Chen, Anchi Su -- Detection protocol of possible crime scenes using internet of things (IoT) / Bashar Alohali -- Solutions for securing end user data over the cloud deployed applications / Akashdeep Bhardwaj -- Cloud computing and cybersecurity issues facing local enterprises / Emre Erturk -- SOHO users' perceptions of reliability and continuity of cloud-based services / Cornel L. Levy, Nilsa I. Elias -- Big data security framework for distributed cloud data centers / Chandu Thota [and 3 others] -- Robotics: Theory and Applications / Kijpokin Kasemsap.
	Sommario/riassunto	"[This book] is an essential reference source for the latest scholarly research on the various types of unauthorized access or damage to

electronic data. Featuring extensive coverage across a range of relevant perspectives and topics, such as robotics, cloud computing, and electronic data diffusion, this publication is ideally designed for academicians, researchers, computer engineers, graduate students, and practitioners seeking current research on the threats that exist in the world of technology"--Provided by publisher.
