Sommario/riassunto	This book provides a comprehensive examination of famous bombers used during World War II, focusing on their design, operational history, and impact on military aviation. Author William Green details various aircraft such as the Heinkel He 111, Boeing Fortress, and Avro Lancaster, exploring their strengths, weaknesses, and roles in the war. Illustrated by G. W. Heumann, the book offers insights into the engineering and strategic importance of these bombers. Green's selection reflects his personal preferences and acknowledges the contributions of other notable bombers that will be covered in a subsequent volume. This work serves as an informative resource for military historians and aviation enthusiasts.
