Sommario/riassunto	"On her 49th birthday, Anna Fergusson, Boston neuroscientist and dedicated introvert, arrives at an unwanted crossroads when the funding for her Huntington's disease research lab is cut. With her confidence shattered and her future uncertain, on impulse she rents a cabin for a year on Australia's Great Barrier Reef. But Turtle Island, alive with sea birds and nesting green turtles, is not the retreat she expected. Here she finds love--for the eccentric islanders who become her family; for Tom, a laid-back turtle whisperer; and for the turtles

whose ancient mothering instincts move her to tears. But Anna finds that even on her idyllic drop in the ocean there is pain, and as the months fly past her dream for a new life is threatened by a darkness that challenges everything she has come to believe about the power of love"--Back cover.
