Sommario/riassunto	Explores the factors leading up to the recent global financial and economic crisis, how the crisis unfolded, and the response of European and national authorities. The book describes the rationale behind the measures undertaken to mitigate the consequences of the recession and to ensure that a similar situation does not happen again in the future. In the wake of the crisis, various major changes continue to significantly affect the life and social organization of Europeans. For instance, a new ESM with a size financially comparable to that of the IMF was created; similarly, the reforms in economic governance imply much more intrusive participation of European countries in each other's macroeconomic policies. Moreover, the organization, regulation, and supervision of the financial sector have been drastically revamped. The decisions taken by European and national authorities affect the daily lives of hundreds of millions of European citizens and countless more around the globe. An insightful read for anyone interested in understanding the topic and its effect on their lives, the book primarily addresses undergraduate students in their final year and graduate

students in fields such as economics, finance, and political science. The main messages are explained through examples and charts. This first volume provides an overview of structure of the European financial system and of the origins of the financial crisis. The second volume focuses on the response given by national and European authorities.

### Sommario/riassunto

The theory behind the PDU model is outlined and the key principles underpinning it are identified. The PDU approach is clearly differentiated from the Nursing Development Unit model. Implementation of key principles is explored in depth, with reference to specific work carried out in the PDU. Issues of evaluation, potential future developments and applications of the PDU model are also discussed. The book is for nurses and other practitioners working in PDUs and NDUs, and for health professionals in any setting with an interest in clinical innovation, practice development, research and leaders
