Sommario/riassunto	It is a blessing, a warning, and a sign that these Six Covenants of the Prophet Muhammad with the Christians of His time have resurfaced at this particular moment in history. Renewed by caliphs and sultans, supported by scores of fatwas, and accepted as law for nearly 1400 years, these documents were common knowledge to educated Muslims and Christians until the collapse of the Ottoman Empire, after which they virtually disappeared from collective consciousness. Their rediscovery will certainly open a new field in both Islamic Studies and interfaith relations.
