Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [225]-238) and index.
Nota di contenuto	The early twentieth century and wartime -- Travellers' lives, 1900-45 -- The state and its legal responses -- Education and missions -- Post-war and the 1960s -- Travellers' lives, 1945-68 -- The state and site provision -- Travellers and the welfare state -- The later years -- State developments and Travellers' responses, 1968-2000 -- Conclusion.
Sommario/riassunto	A minority and the state' is a much needed history of Britain's travelling communities in the twentieth century, drawing together detailed archival research at local and national level to explore the impact of state and legislative developments on Travelers, as well as their experience of missions, education, war and welfare. It also covers legal developments affecting Travelers and crucially argues that their history must not be dealt with in isolation but as part of a wider history of British minorities II. It will be of interest to scholars and students concerned with minority groups, the

Sommario/riassunto	This comprehensive volume focuses on mechanisms leading to pituitary tumor formation and progression. The individual chapters provide timely updates on developments in the rapidly expanding field of pituitary tumor pathogenesis. Researchers from leading centers describe the fundamental functional anatomy of the pituitary, the structure and function of the hypothalamic hormone receptors as they relate to human pituitary adenomas, as well as disordered transcription factors, growth factors and signaling proteins in pituitary tumorigenesis. They also present transgenic models of pituitary tumor formation and report on chromosomal deletions observed in both hereditary and sporadic adenomas. The book is an essential and timely resource for basic and clinical endocrinologists, neurosurgeons and

neuro-oncologists as it provides a state-of-the-art summary of our current understanding of the pathogenesis of these common tumors.
